Replacement Windows Can Cut Your Energy Costs

Replacement Windows Can Save You Hundreds of Dollars on Your Energy Bills

As temperatures continue to soar across the nation these past few weeks, energy bills are beginning to rise as well. The cost of keeping a house cool in unrelenting summer heat can easily become an unacceptable burden – especially in older homes with outdated exterior defenses. Your home's exterior is your first line of defense against all of nature's weather elements. Aging windows that do not have [glazed glass](#) or proper sealants are just as detrimental and costly as a leaky roof.

At [Waddle Exteriors](#), we know that the air leaks in your old windows are costing you just as much as the cost of damage from a leaky roof. Replacing your old windows with state of the art vinyl windows from Waddle Exteriors will create significant instant savings on your cooling bills this summer.

Customize Your Windows

All of our [replacement windows](#) are completely customizable. You can choose a window style to match your existing home's design – everything from the exterior color to the interior wood finish will be decided by you.

Expert Design & Installation

Custom design and [professional expert installation](#) ensures that your windows will fit the existing opening perfectly and that the seal will be leak free. Our replacement vinyl windows feature glass made with the latest technology. Glazed double pane windows keep harmful UV rays out while letting beautiful summer sun shine in. Our energy efficient replacement windows are also extremely effective against harsh Iowa winters.

Call Us Today

Replace your drafty old windows today to start working towards long term savings on your energy bills. [Contact us online](#) or call 877.733.6400 today to learn more!

take this opportunity to thank you for all you have done to support us and enable us to finish House #8 for our partner family to be able to move in. We appreciate all you have done for Habitat and look forward to working with you in the spring."

Ultimate Guacamole

Ingredients:

4 ripe avocados - peeled, pitted, and sliced
1/2 cup salsa of your choice
1/4 teaspoon garlic powder
1/2 teaspoon hot sauce
1 pinch salt

Directions:

Place the sliced avocados into a food processor. Set the processor on medium and slowly add salsa until the texture is lumpy. Add the garlic powder and hot sauce. Continue to process until smooth but not too runny. Salt to taste.

Cutting Costs At Home This Summer

Unplug this summer!

Are your energy bills driving you crazy this summer? Do you dread the onslaught of summer heat because it means that you will be paying significantly more each month to keep your house cool?

You might not be able to control the summer temperature but there ARE some ways that you can cut costs on your summertime energy bills:

- Unplug all of your household appliances when you're leaving for trips. Household electronics suck energy from sockets anytime they are plugged in – NOT just when they are turned on. Ensuring that everything from the toaster to your living room lamps are unplugged when you leave the house will help save you money.
- Turn the thermostat up a couple of degrees. The difference between the two temperatures isn't going to make a huge difference in your comfort level but it will make a huge difference on your next energy bill.
- Close your blinds during the peak heat of the day. Keeping your curtains closed against direct sunlight for even a couple of hours a day will help keep your home cool. Invest in some fans. Fans keep the air circulating and allow you to turn up the thermostat a bit on even the hottest summer days.
